About me

I am a **Full-stack JS Developer** with a decent experience in *architecting and building web applications* and finding new, more flexible, highly efficient, more synthetic as well as more performing and elegant ways to do it.

A far-sighted *problem preventer*. Being highly *adaptable*, I'm able to quickly pick up and *work with any architecture or libraries* required. I can estimate the time needed to complete a task (and a project), plan and lead the work of a team of 5-7 people to complete a project respecting the deadlines.

Passionate about creating a favorable work environment through effective *coordination and communication* with managers, designers, developers and clients to produce stand-out work. *Good analytical thinking* with talent for identifying, scrutinizing and improving work processes

Employment

Full-stack JS Developer

January 2017 - February 2019

Coingaming

- Building an interconnected architecture of applications
- Configuring *CircleCI* and *GitlabCI*
- Managing and deploying with *Kubernetes*
- Creating a microservice architecture using *NodeJS* combined with *GraphQL*
- Creating isomorphic applications using *Meteor*
- Developing Progressive Web Applications with *React* and *Relay*
- Creating bot applications using *NodeJS*
- Mentoring and tutoring new team members

Front-end developer

February 2016 - October 2016

Mixera

As a Lead Front-end Developer my responsibilities were:

- Making Single Page Applications with *ExtJS* and *React/Redux*
- Creating custom solutions and working with a large project
- Analyzing performance and developing better solutions
- Working in a team and managing tasks

Freelance Web Developer

November 2015 - January 2016

Independant Freelancer

- Developed websites for different clients
- Identified issues with existing web-sites and introduced smart and efficient fixes
- Conducted correspondence with clients to obtain more information and discussed design options as well as suggested relevant and unique product solutions
- Determined appropriate architecture to achieve the best troubleshooting options

Projects

Student course "Introduction to Frontend Development"

September 2016 - November 2016

Co-founder and speaker of the course

Education

Bachelor's Degree

2014 - 2018

NTUU Kyiv Polytechnic Institute

Studying software engineering.

Soft Skills
